Contents

Preface	i
Acknowledgment	iii
I Basic Concepts	3
0 Preliminary	5
0.1 Conventions	7
0.2 Patterns of theorems and proof	7
1 Sets	9
1.1 Definitions and Basic Theorems	11
1.1.1 Definitions	11
1.1.2 Basic Theorems	13
1.2 Problems	15
1.3 Solutions	19
2 Logic	39
2.1 Definitions	41
2.1.1 Propositional Logic	41
2.1.2 Predicate Logic	45
2.1.3 Predicates and Sets	46
2.2 Logical Proof	46
2.2.1 Laws of Logic	47
2.2.2 Rules of Inference	49
2.2.3 Inference Rules for Quantified Predicates	50

2.3	DNF and CNF	50
2.3.1	The DNF of a given wff	51
2.3.2	The CNF of a given wff	53
2.3.3	A shortcut to find the DNF and CNF	55
2.4	Problem	57
2.5	Solutions	67
3	Mathematical Induction	103
3.1	Concepts	105
3.1.1	Necessary Conditions of Using Mathematical Induction	105
3.1.2	The Underlying Theory of Mathematical Induction	106
3.1.3	Mathematical Induction of the First Form (Weak Induction)	107
3.1.4	Mathematical Induction of the Second Form (Strong Induction)	108
3.2	Mathematical Induction and Recursive Definition	109
3.2.1	Recursive Definitions for Functions	109
3.2.2	Recursive Definitions for Sets and Structural Induction	111
3.3	Nested Induction	113
3.3.1	The underlying logic of nested induction	114
3.4	Problems	116
3.5	Solutions	122
4	Relations	157
4.1	Definitions, Theorems, and Comments	159
4.1.1	Definitions	159
4.1.2	Theorems	163
4.2	Problems	164
4.3	Solutions	168
5	Functions	185
5.1	Definitions, Theorems, and Comments	187
5.1.1	Definitions	187
5.1.2	Theorems	189
5.2	The Pigeonhole Principle	190
5.3	Asymptotic Notations	191

5.4	Problems	196
5.5	Solutions	198
II Specific Topics		209
6	Integers	211
6.1	Floor and Ceiling Functions	213
6.2	Divisibility	214
6.3	Greatest Common Divisor	217
6.4	Congruence	225
6.5	Solving Linear Congruence Equations	230
6.6	Solving Linear Congruence Equations with multiple variables	233
6.7	Applications	235
6.7.1	Chinese Remainder Theorem	235
6.7.2	Fermat's Little Theorem and Euler's Theorem	238
6.7.3	RSA Cryptosystem	241
6.8	Problems	244
6.9	Solutions	248
7	Binomial Theorem and Counting	271
7.1	The Binomial Theorem	273
7.2	Principles and Typical Problems for Counting	276
7.2.1	Urns and Balls Model	278
7.2.2	Summary	284
7.3	Problems	287
7.4	Solutions	294
8	Recurrence Relations and Generating Functions	331
8.1	Recurrence Relations	333
8.1.1	Definitions	335
8.2	Solving Recurrence Relations	336
8.2.1	Repeated Substitution Method	336
8.2.2	Characteristic Root Method	337
8.2.3	Generating Function Method	342

8.2.4	An Example	344
8.3	Problems	348
8.4	Solutions	351
9	Discrete Probability	371
9.1	Definitions and Terminologies	373
9.1.1	Examples and Discussion	376
9.2	Theorems of Probability	378
9.3	Problems	380
9.4	Solutions	384
10	Graphs	399
10.1	Definitions, Theorems, and Comments	401
10.1.1	Definitions	401
10.2	Problems	413
10.3	Solutions	419
III	Appendices	433
A	Loop Invariance	435
B	Sample Quizzes	441
